- ◆ Web Design
- ◆ Technologies
- ◆ Education & self-development
- ◆ Finance & investing
- ◆ Cycling & hiking
- ◆ Travel & the outdoors
- ◆ Fitness & training

PROFILE

AI-native Project Manager & Data Analytics Specialist with 12+ years at AT&T Global Network Services. On a daily basis I orchestrate agentic AI workflows, apply AI-native tooling to web design projects, and project-manage the delivery of SQL-based data solutions and Power BI dashboards that drive decisions across a global IT/Telco organisation. My career has evolved from end-to-end project delivery through process governance into data intelligence — underpinned throughout by SLA/KPI design, cross-functional coordination and senior stakeholder management. CAPM-certified, MSc in Public Administration.

PROFESSIONAL EXPERIENCE

Data Analyst — Senior Specialist ◀ Current Role

AT&T Global Network Services Slovakia · Bratislava 06/2019 - Present

- ▶ **Client & requirements management:** Gathered business requirements directly from clients through structured meetings, built a clear understanding of business needs, and partnered with development teams to design and deliver tailored data solutions.
- ▶ **Executive reporting:** Delivered executive-level Power BI dashboards and reports used by senior leadership to track and communicate key operational metrics across the organisation.
- ▶ **Cross-functional delivery:** Partners with engineering teams across Snowflake, Quickbase, Power BI and ServiceNow to translate business requirements into scalable data solutions.
- ▶ **Compliance & risk ownership:** Managed server update and patching governance based on vulnerability reporting, ensuring full alignment with AT&T global security standards.
- ★ **Achievement:** 100% AT&T security compliance achieved; Power BI dashboards became the reporting standard across the team.

Process Engineer — Senior Specialist

AT&T Global Network Services Slovakia · Bratislava 06/2018 - 06/2019

- ▶ **Strategic shift:** Moved from individual project delivery into the Assurance, Quality & Metrics organisation, taking end-to-end ownership of the E2E pillar to drive systemic process improvements as Pillar Coordinator.
- ▶ **Governance & reporting:** Built the internal communication and reporting framework; organised cross-team governance meetings and tracked project status in the Wave system.
- ★ **Achievement:** Coordinated the E2E pillar governance structure, closing cross-team reporting gaps and improving delivery visibility.

Business Unit Project Manager — Specialist

AT&T Global Network Services Slovakia · Bratislava 05/2016 - 06/2018

- ▶ **Promoted post-CAPM:** Elevated to Specialist following CAPM certification and demonstrated leadership on increasingly complex delivery programmes.
- ▶ **Team leadership:** Led a team of senior project managers on the high-visibility NTE Recovery project, coordinating delivery and escalation management.
- ▶ **Performance & talent:** Defined function-level KPIs, reported team delivery performance to senior management, and onboarded new joiners.
- ★ **Achievement:** CAPM-certified; led the NTE Recovery project team — subsequently selected for an E2E process leadership role.
- ★ **Achievement:** Received the 'Service Excellence Award' in 2018 in recognition of outstanding delivery and client service.

Business Unit Project Manager — Junior

AT&T Global Network Services Slovakia · Bratislava 02/2014 - 05/2016

- ▶ **Delivery ownership:** Joined AT&T GNS as a Junior PM, accountable for end-to-end delivery of telco projects and installations on time and within budget.
- ▶ **Client & vendor management:** Set client expectations from project initiation; worked closely with vendors to define technical requirements for complex network orders.
- ▶ **Stakeholder communication:** Acted as the primary point of contact for internal and external clients and stakeholders throughout the full project lifecycle.
