PROFILE

Project Manager & Data Analytics Specialist with 12+ years in IT services delivery at AT&T Global Network Services. I deliver SQL-based data solutions and Power BI dashboards, applying AI-native tooling across a global IT/Telco organisation. My career spans project lifecycle management, process governance, continuous improvement and data intelligence — underpinned by SLA/KPI design, cross-functional coordination and senior stakeholder management. CAPM-trained (2015), MSc in Public Administration.

PROFESSIONAL EXPERIENCE

Data Analyst — Senior Specialist

AT&T Global Network Services Slovakia · Bratislava

06/2019 – 07/2026

- **Client & requirements:** Gathered business requirements from clients and delivered tailored data solutions in an IT services environment.
- **Cybersecurity & compliance:** Managed IT security governance across ServiceNow environments through vulnerability reporting, achieving 100% AT&T cybersecurity compliance.
- **Reporting & delivery:** Delivered Power BI dashboards to senior leadership; partnered across Snowflake, Quickbase and ServiceNow to build scalable data solutions.
- ★ **Achievement:** 100% AT&T cybersecurity compliance achieved.

Process Engineer — Senior Specialist

AT&T Global Network Services Slovakia · Bratislava

06/2018 – 06/2019

- **Continuous improvement:** Joined the Assurance, Quality & Metrics team as E2E Pillar Coordinator, driving continuous improvement of delivery workflows.
- **Governance & reporting:** Built the internal reporting framework and organised cross-team governance meetings, closing reporting gaps and improving delivery visibility.
- ★ **Achievement:** Coordinated the E2E pillar governance structure, closing cross-team reporting gaps and improving delivery visibility across the organisation.

Business Unit Project Manager — Specialist

AT&T Global Network Services Slovakia · Bratislava

05/2016 – 06/2018

- **Team leadership:** Directly led 3 senior project managers on the NTE Recovery project, managing workload allocation and individual performance.
- **Fallback & recovery:** Established the NTE Recovery process — a cross-functional framework to systematically resolve misplaced Network Terminating Equipment installations.
- **Performance & KPIs:** Defined function-level KPIs and reported team delivery performance to senior management.
- ★ **Achievement:** CAPM-trained (2015); led the NTE Recovery project team — subsequently selected for an E2E process leadership role.
- ★ **Achievement:** Received the 'Service Excellence Award' in 2018 in recognition of outstanding delivery and client service.

Business Unit Project Manager — Junior

AT&T Global Network Services Slovakia · Bratislava

02/2014 – 05/2016

- **Delivery:** Accountable for end-to-end delivery of IT services projects and network installations on time and within budget.
- **Client & vendors:** Set client expectations at project initiation; defined technical requirements with vendors for complex network orders.
- **Stakeholder management:** Primary point of contact for all clients and stakeholders throughout the full project lifecycle.
