MAREK OREL

DELIVERY & SERVICE OPERATIONS MANAGER

PROFILE

Delivery-focused leader with 10+ years in IT/Telco project, service and operations management at AT&T Global Network Services, progressing from project delivery to leading data and process-optimization initiatives across a global organization. Experienced in end-to-end ownership of deployments and handover to operations, SLA/KPI governance, cross-functional coordination and client-facing reporting (Power BI, SQL). CAPM-certified, with a Master's degree in Public Administration and a strong process-improvement mindset, motivated to bring this delivery and governance experience to a senior service-ownership role.

PROFESSIONAL EXPERIENCE

Data Analyst (Senior Specialist)

06/2019 – Present

AT&T Global Network Services Slovakia

Bratislava

- **Service & data governance:** managed data and reporting requests across AT&T, owning the build and maintenance of data models in SQL.
- **Client-facing reporting:** designed and administered Power BI outputs aligned to client and stakeholder requirements.
- **Cross-functional coordination:** ran requirement-gathering calls with internal clients and partnered with developer teams across Power BI, Quickbase, Snowflake and ServiceNow.
- **Compliance & risk ownership:** managed server update and patching governance based on vulnerability reporting, achieving 100% compliance with AT&T security standards.

Pillar Coordinator (Senior Specialist)

06/2018 – 06/2019

AT&T Global Network Services Slovakia

Bratislava

- **Process optimization:** moved into the Assurance, Quality & Metrics organization, taking ownership of the E2E pillar as coordinator.
- **Governance & reporting:** owned internal communication across teams, organized governance meetings, and tracked project status in the Wave system.

Business Unit Project Manager (Specialist)

05/2016 – 06/2018

AT&T Global Network Services Slovakia

Bratislava

- **Promotion:** promoted to specialist level shortly after obtaining the CAPM certification.
- **Team performance & KPIs:** reported on team performance and helped define KPIs for the function.
- **Leadership:** led a team of senior project managers on the NTE Recovery project.
- **Talent development:** participated in hiring and trained newcomers joining the team.

Business Unit Project Manager (Junior)

02/2014 – 05/2016

AT&T Global Network Services Slovakia

Bratislava

- **Delivery ownership:** accountable for delivering assigned projects and installations on time and within budget.
- **Client & vendor management:** set client expectations and worked with vendors to gather technical requirements for complex orders.
- **Stakeholder communication:** primary point of contact for internal and external clients throughout the project lifecycle.
